Warehousing

Storage of goods in the warehouse, at the level of sales unit (pallet, box or piece), in order to optimize the goods receipt and picking operations.

- Average term storage
- Long term storage
- Management of the products with a certain term of validity, lots, series, etc.
- Cross-docking in our own platform
- Customs clearance operations

IT solutions

- real time monitoring of stocks
- orders situation and status
- returns status
- specific reports

Based on partnerships with specialized companies, we provide inbound or outbound transport services, from or to any country in the EU, mainly to and from the countries in the region - RO, BG, HU, where we collect and supply in maximum 24h.

Transport: land, air, sea

o national coverage

o international coverage *

Returns logistics: Processing returns, quality inspection according to the established specifications, refurbish for certain categories, repacking or labelling – ensuring the reinsertion into the active stock. We can provide blocking of certain lots of products upon request.

- Returns collection
- Returns transfer to unrestricted stock

Order processing: all operations are carried out through mobile terminals, by scanning, using a state-of-the-art WMS (Warehouse Management System).

- o Goods receipt
- o Invoice & AWB
- o Order processing
- o Delivery to client
- o Packing (pick & pack)
- o Returns collection

* QeOPS, as a member of WCA - World Cargo Alliance, provides transport solutions from and to any location in the world.

Consulting

- Logistics consulting
- Transport, packing and product safety consulting
- Transport and distribution audit

QeOPS protects the environment! The entire process is paperless!

- Optional customized services: weighing, assembling, packing (individual, promotional, shrink film), adding documentation (manual for use, guarantee certificate), labelling etc.
